

Equation of a Line (from a Graph)

The graph here has a **y-intercept** of _____ because it passes through the point (_____ , _____).

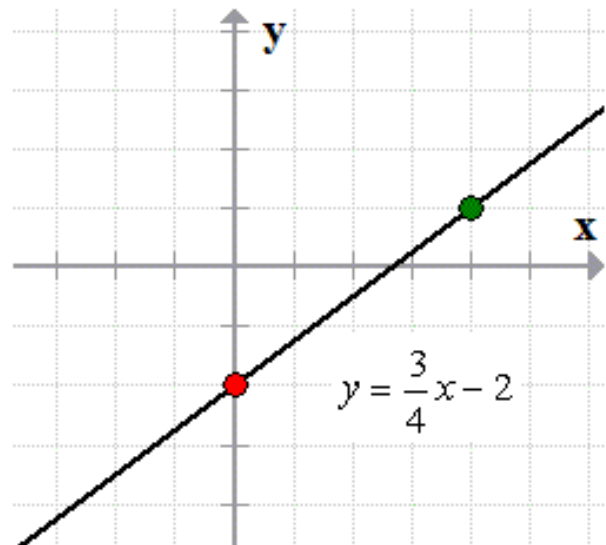

To get from one point to the next, you:

rise (up) _____ and

run (right) _____

and so the graph has a **slope** of _____

The equation of the line is:

The graph here has a **y-intercept** of _____ because it passes through the point (_____ , _____).

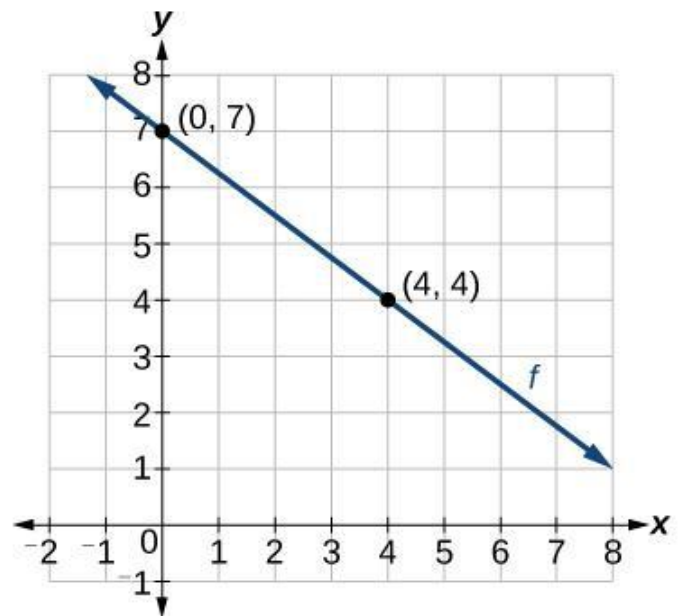

To get from one point to the next, you:

rise (up) _____ and

run (right) _____

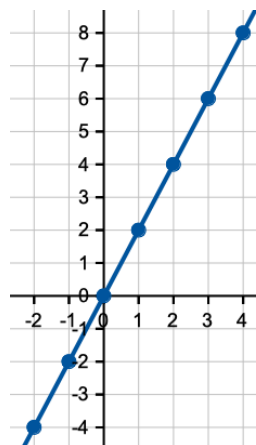

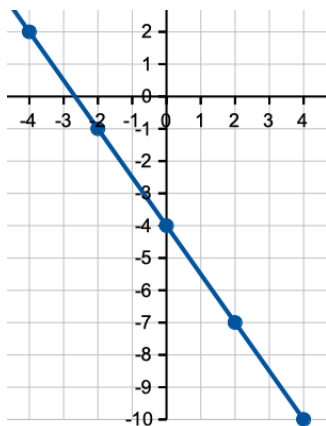

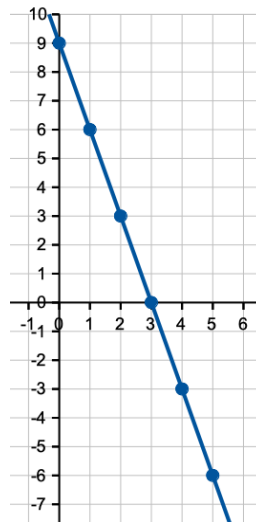

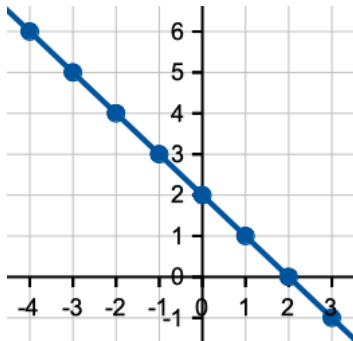

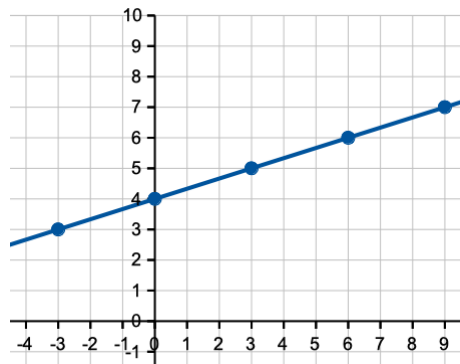

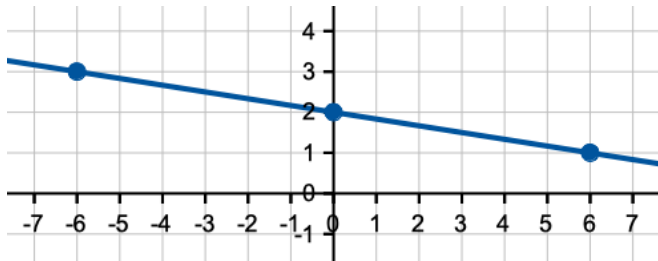

and so the graph has a slope of _____

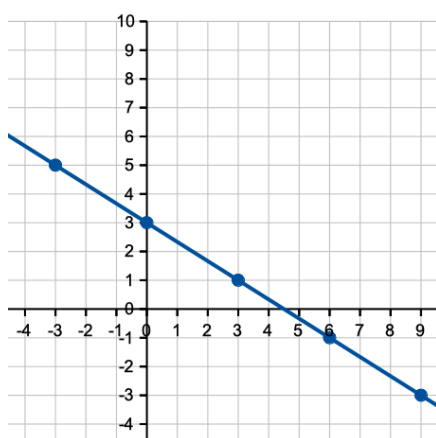

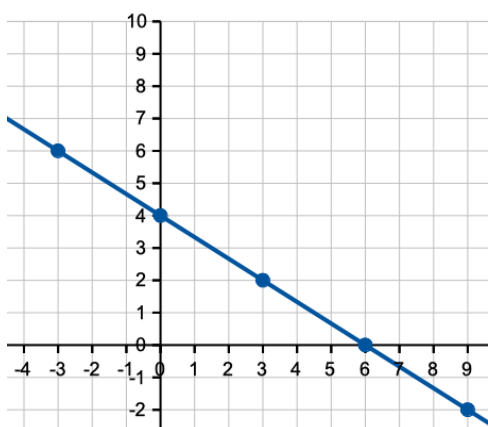

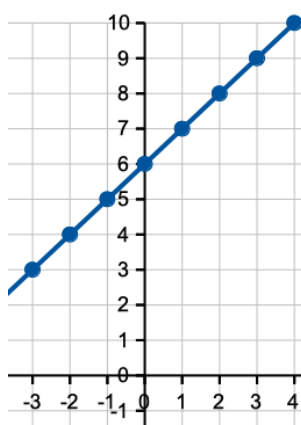

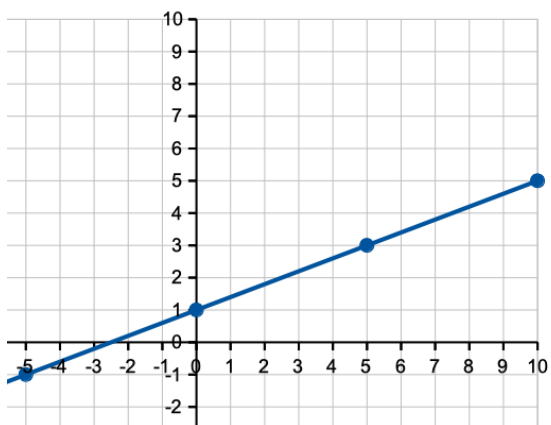

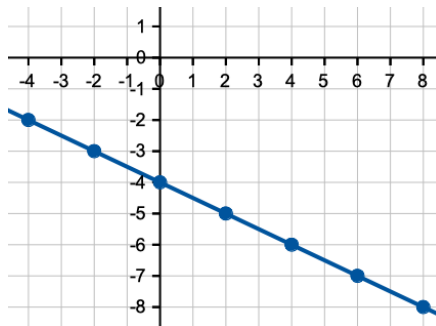

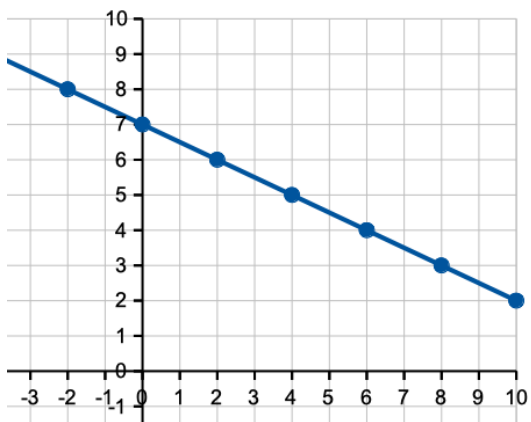

The equation of the line is:

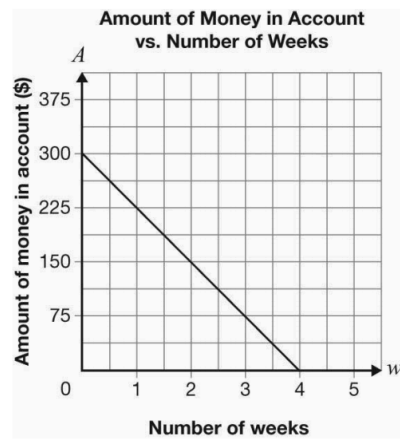

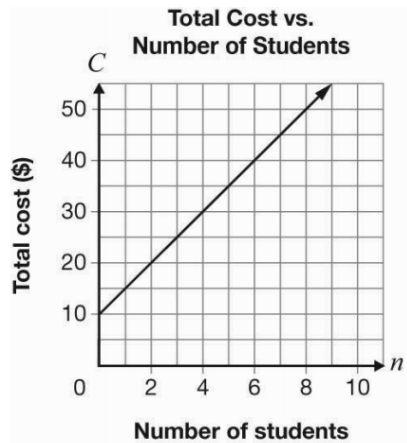

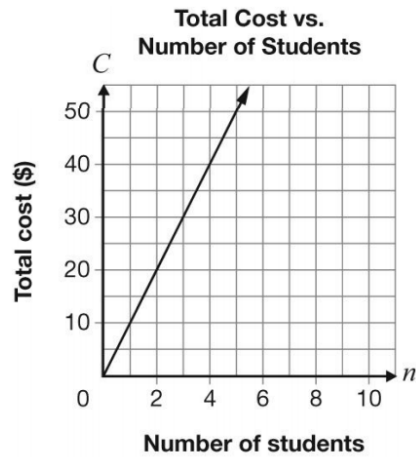

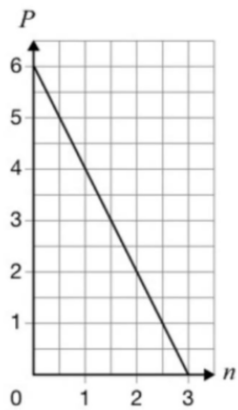

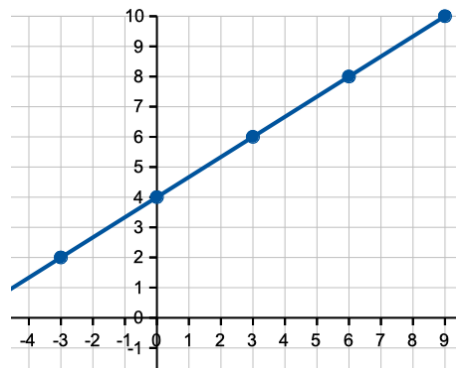

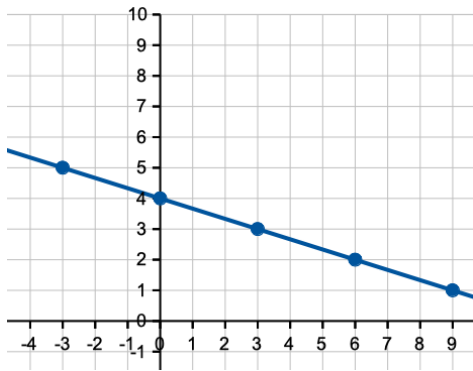

Practice

Create the equation for each of these lines.

HOMEWORK: Equation from Graph

Create the **equation** for each of these lines.
